

How to identify a

NEUROENDOCRINE CANCER

when it's not part of the typical line-up

Join our patients in an interactive, case based online activity, on how to diagnose and treat neuroendocrine tumours in general practice

By the end of this course, participants will be able to:

- Discuss the pathophysiology and epidemiology of neuroendocrine tumours (NETs)
- Outline the symptoms of NETs
- Describe appropriate investigations and diagnostic pathways for patients with suspected NETs
- Outline pharmacological and non-pharmacological treatment options for NETs and their appropriate clinical application
- Using a multidisciplinary team, formulate a whole-person approach to the management of patients with NETs
